

Rodan + Fields Acute Care Skincare for Expression Lines

Treating crow's feet, in particular, is extremely challenging because the wrinkle is caused by a combination of muscle contractions and thinning skin. Rodan + Fields Acute Care Skincare for Expression Lines' unique approach of aggressively targeting a wrinkle overnight is a game-changer. Think of it as an at-home alternative to an injectable filler—allowing people to achieve impressive results without the need for clinic-based procedures by delivering hyaluronic acid through Liquid Cone Technology™ (instead of a needle) to fill wrinkles.
