A Patch That Erases Wrinkles Like Botox

If you have one wrinkle that drives you crazy (or, OK, maybe a few), but you're hesitant about going to a derm for a little Botox, then [Rodan + Fields Acute Care Patches](#), \$220 for 10 packs of two, are for you. You apply a patch directly onto a wrinkle before bed, and while you sleep the patch infuses the wrinkle with skin-plumping hyaluronic acid and peptides. (Each patch is made up of pointy cones that conform to the shape of the wrinkle for maximum results.) In the morning, the wrinkle is noticeably smoother and far less crazy-inducing, and the results last all day. (Bonus: Use them three times a week for a month, and the results last up to eight weeks.)
