Need some extra care for your skin or hair? Here are the new essentials for your beauty arsenal.

**Sultra Bombshell Reverse Cone Rod Curling Iron** creates the texture and shape you seek but is rarely achieved with traditional curling methods. It emits infrared rays, making it kind to color-treated locks (\$130, nordstrom.com). **Colorescience Sunforgettable Mineral Sunscreen Brush SPF 30** is soft and subtle, yet impenetrable—with complete UVA and UVB coverage (\$50, colorescience.com). **Tria Hair Removal Laser 4X** permanently removes hair and is the only FDA-cleared laser for home use (\$449, triabeauty.com). **Rodan + Fields REDEFINE MACRO Exfoliator** collects flaky, dead skin, then leaves the rest baby fresh (\$279, rodanandfields.com). **BMR Facial Toner** gently massages with pulses that revitalize nerves around facial muscles (\$395, bmrbeauty.com). **Oxygenetix Oxygenating Foundation in Ivory** covers the skin while letting it breathe and heal, and encourages collagen cell regrowth (\$66, oxygenetix.com).
